

Mohamed Megahed

Frontend Web developer

I am a Frontend Web Developer crafting responsive, thoughtful web experiences. I believe a website is more than code — it is a feeling, a flow, a conversation. Guided by simplicity, elegance, and utility, I shape interfaces with intention. I build not just for screens, but for people, creating digital spaces that truly matter.

EDUCATION

Zoology

Faculty of Science Aswan University,

WORK EXPERIENCE

Intern at

Aswan Oncology Centre

Achievements/Tasks

- Training at this place made me very responsible as the people there are already suffering from severe diseases, so you need to get your job done from the first time as there is no room for mistakes
- It was very challenging to me as a trainee to go to a place like this but actually that made me very skilful in no time as I dealt with very hard cases.
- Compassion, sympathy, and responsibility are the three words that sum up this period.

Intern at

Aswan University Hospital

Achievements/Tasks

- University hospitals are well known for the wide range of cases they treat so training there widened my horizons and me deal with a lot of different diseases that I haven't seen before.
- This hospital was treating a lot of patients, so we were always under stress as we need to handle several patients at the same time, so it made me very skilful in working under stress.

Intern at

National Research Centre

Achievements/Tasks

- This training was in a different branch of science than the branch I learned in college, so I dealt with people from different colleges and different governorates, so it made me very open minded and more ready to accept others' opinions.
- Dealing with people from different places made me very eager to prove myself and always ready to do my best.
- working in groups and trying to solve problems together is the best thing I have learned at this place.

SKILLS

Microsoft office expert

High English level

very communicative

PERSONAL PROJECTS

Aswan-Med

- A user-friendly medical platform for Aswan city. Enables filtering doctors by specialty and subarea, provides contact details, working hours, and Google Maps integration for quick navigation.

Social Medium

- A distraction-free writing platform where users can share thoughts, publish posts, and engage with others seamlessly, without clutter, focusing entirely on meaningful content creation.

Habitcon

- A productivity platform that helps users maintain control of their routines. Features include a streak counter, week navigator for marking past habits, and continuous tracking to reinforce consistency.
